

AIR COMBAT COMMAND

PEOPLE FIRST - MISSION ALWAYS

ACC WEAPONS SAFETY DIVISION (SEW)

Current as of January 31, 2023

OVERVIEW

The ACC Weapons Safety Division (SEW) is a team of highly-skilled safety professionals that manage the weapons safety portion of the mishap prevention program across ACC. Responsibilities of the division include explosives site planning; assessing explosives risk to operations; nuclear surety; mishap investigation and reporting; and providing weapons safety expertise to COMACC and HQ ACC directors.

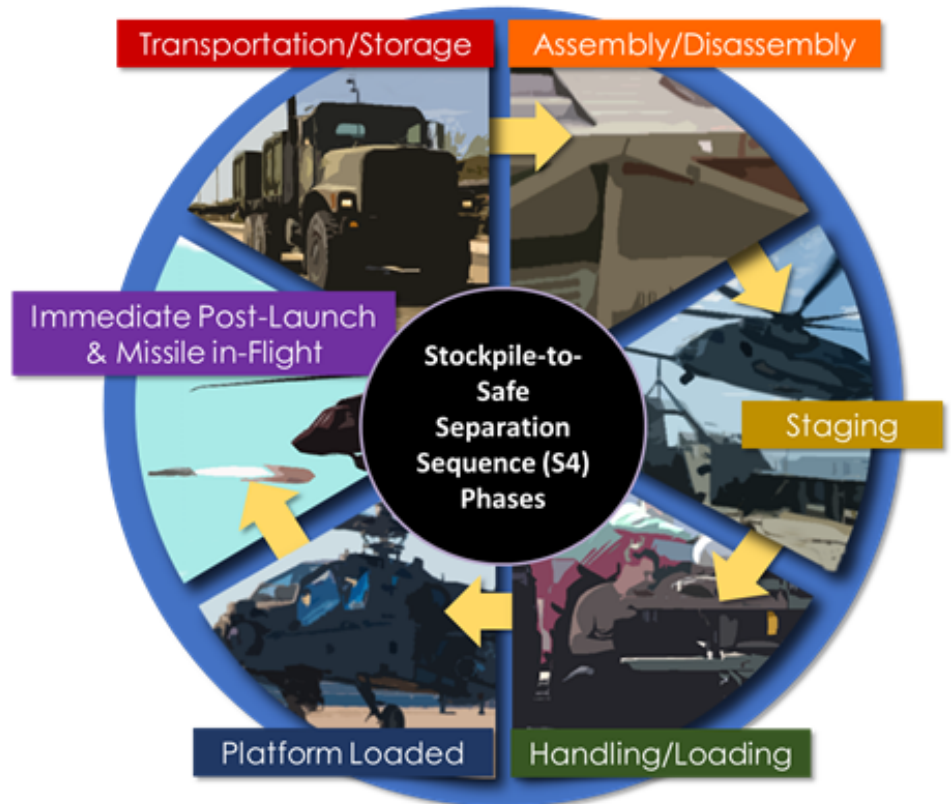

ORGANIZATION

The SEW division reports to the ACC Director of Safety and is comprised of 2 civilian and 2 active duty military personnel. This team represents over 100 years of combined experience in the weapons safety discipline, and the maintenance, operation, and disposal of non-nuclear munitions.

MISSION

The SEW division: ensures ACC units understand and comply with all explosive, missile, nuclear surety and directed energy safety standards; trains, mentors, and advises weapons safety personnel; evaluates wing weapons safety programs; and develops weapons safety policy for ACC and the Air Force. Weapons Safety directly supports all phases of the munitions Stockpile-to-Safe Separation Sequence.

Critical phases involve munitions assembly/disassembly, especially with sensitive explosive components, and loading fully assembled weapons onto or off of aircraft.
