

ACC Winter Safety Tips

Winter Driving

There is always the possibility, no matter where you live, that “Old Man Winter” may show us all that he is still the boss.

Do your best to be prepared for any driving scenario that might be thrown your way this winter. Here are a few tips...

Be aware of black ice and know what to do if you find your self in a slide.

Clear the snow and ice from your vehicle’s roof, hood and trunk and especially from the windows, mirrors and lights.

At a minimum ensure your vehicle is ready for winter by:

- Checking your tires
- Checking your battery
- Checking your fluid levels

A close-up of a car's dashboard showing a warning light. The text "SERVICE ENGINE SOON" is illuminated in orange. Below the text, several other indicator lights are visible, some of which are also illuminated.
